PROFILE SUMMARY

Passionate mobile developer with over 5 years of experience in building scalable, user-centric applications using Flutter and Dart. Seeking opportunities to create innovative mobile solutions, collaborate with dynamic teams, and contribute to cutting-edge projects while advancing expertise in cross-platform development.

WORK EXPERIENCE

TechitCheap, *Mobile Developer*   April 2025 – June 2025
- Led development of a fintech app in Flutter, implementing time-based graph and cashflow analysis using fl_chart and receipt generation, successfully deploying the project after a two-year delay from previous developers.
- Refactored an unstructured codebase by adopting MVVM architecture using provivder, separating UI from business logic, minimizing setState usage, and optimizing API calls with http, enhancing code maintainability and scalability.
- Built dynamic financial visualization features with fl_chart, enabling users to analyze cashflow and transaction data across daily, weekly, monthly, and yearly timeframes, improving financial decision-making.
- Reduced bug reports by 30% through systematic debugging, robust error handling, and code optimization, delivering a stable and reliable fintech application.
- Optimized API interactions using http package, streamlining data retrieval and improving response times for a seamless user experience in a high-stakes fintech environment.
- Collaborated with stakeholders to address legacy code challenges, align features with business needs, and deliver a modern, user-centric fintech solution.

Klama (QuickConnect), *Mobile Developer*   Dec 2024 – May 2025
- Rebuilt a flawed bills payment app with poor user experience using Flutter, addressing issues like confusing navigation and unreliable payment processing.
- Designed a modern, intuitive interface with streamlined workflows, significantly enhancing user-friendliness and accessibility for diverse audiences.
- Improved app reliability by optimizing payment integrations and backend API calls, ensuring seamless and secure transactions.
- Collaborated with UX designers and stakeholders to incorporate user feedback, resulting in widespread positive reviews and increased user trust post-relaunch.

Klama (Enviable Logistics), *Mobile Developer*   Aug 2024 – Jan 2025
- Designed and developed ELA, a cross-platform app using Flutter, reducing API response by 30% through optimised data handling.
- Collaborated with designers to implement platform-specific features for seamless iOS and Android performance.
- Utilized Git for version control and integrated RESTful APIs for real-time data synchronization.

Aipalbot, *Mobile Developer*   Aug 2020 – June 2024
- Built intuitive UI screens with Flutter, boosting user engagement by 25% based on feedback analytics.
- Integrated RESTful APIs and SOAP web services, streamlining authentication and data rendering across platforms.
- Designed MVVM architecture for UI components, improving code maintainability and scalability.
- Leveraged Android Studio, Git, and GitHub for development and version control.

EDUCATION

Federal University of Technology Akure, Nigeria   Nov 2024
Bsc, Computer Science

RELEVANT COURSEWORK

Data Structure And Algorithms | Object-Oriented programming | Database Systems | Networking & Security | Software Engineering Principles.

TECHNICAL SKILLS

Mobile Development | Api & Databases | Testing | Agile Development

SOFT SKILLS

Collaboration | Problem-solving | Adaptability | Contract Negotiation | Time Management

INVOLVEMENT EXPERIENCE

Flutter Forward Akure, *Member*   Mar 2023

At Flutter Forward Extended in Akure, Nigeria (Mar 2023), I participated in workshops on Flutter performance optimization and UI/UX best practices, applied techniques to improve app load times by 20%, and networked with tech professionals to stay updated on mobile development trends.
